

22 February 2024

March 2024 Conference Participation

Savannah Resources Plc, the developer of the Barroso Lithium Project (the 'Project') in Portugal, Europe's largest spodumene lithium deposit, is pleased to announce that it will be attending the following industry and investor conferences during the month of March:

- [PDAC 2024, 3-6 March, Toronto, Canada](#): Savannah will be attending this year's convention, one of the world's leading mineral exploration and mining events, as part of a wider EU delegation and will be based at the EU booth in the South Pavilion.
- [Giga Europe 2024, 12-13 March, Stockholm, Sweden](#): The annual conference for the European Lithium-ion battery industry hosted by Benchmark Mineral Intelligence.
- [Value Investing FM's Grand event, 16 March, Madrid, Spain](#): Bringing together mining and exploration companies with institutional and private investors.

Savannah Resources' CEO, Emanuel Proença said, "We're looking forward to attending these three international events next month, which provide a great opportunity for us to meet with investors and industry players to update them on our recent progress at the Project. If you would like to meet with a member of the Savannah team at one of these events, do let us know".

Savannah – Enabling Europe's energy transition.

About Savannah

Savannah Resources is a mineral resource development company and the sole owner of the Barroso Lithium Project in northern Portugal, the largest battery grade spodumene lithium resource outlined to date in Europe.

Through the Barroso Lithium Project (the 'Project'), Savannah will help Portugal to play an important role in providing a long-term, locally sourced, lithium raw material supply for Europe's rapidly developing lithium battery value chain. After the Environmental Licence was granted in May 2023 and the Scoping Study confirmed the economic potential of the Project in June 2023, production is now targeted and on track to begin in 2026. At that stage, Savannah will start producing enough lithium for approximately half a million vehicle battery packs per year, equal to a significant portion of the European Commission's Critical Raw Material Act goal of a minimum 10% of European endogenous lithium production set for 2030. Savannah is focused on the responsible development and operation of the Barroso Lithium Project so that its impact on the environment is minimised and the socio-economic benefits that it can bring to all its stakeholders are maximised.

The Company is listed and regulated on the London Stock Exchange's Alternative Investment Market (AIM) and the Company's ordinary shares are also available on the Quotation Board of the Frankfurt Stock Exchange (FWB) under the symbol FWB: SAV, and the Börse Stuttgart (SWB) under the ticker "SAV".
